Remove Tag when Programming

If the AUWFOB wireless remote control key comes with a system kit, it has been pre-programmed and is not necessary to program it. You could remove the battery protection tag -

Replace or Reinstall Battery

i. Remove back cover screw and back cover.

ii. Replace or reinstall the CR2032 Lithium coin size Battery from its holder in the correct polarity as shown.

iii. Replace back cover and tighten the screw.

Programming AUWFOB Remote Control Keys into wireless system

i. Press Learn button on APFES/APFW10 board, it gives two beeps, then yellow LED is on to indicate learn mode now after release off.

ii. Under learn mode, press any key on unregistered wireless remote key, Red LED on APFES/APFW10 will flash fast twice and give two beeps to indicate OK.

HEALTH WARNING:

The Remote Control unit is fitted with a Coin Cell (CR2032) battery. When removing this cell, do not place in your mouth as this could impair your health. Also please ensure young children are kept out of reach from this battery to prevent them from swallowing it and choking.
