QUICK SETUP GUIDE

SLFLEDWIFI

Thank you for Purchasing the SLFLEDWIFI

This LED security floodlight with built in HD CCTV camera and WIFI can easily be configured via 3 different methods

- a. With the WPS button present on the unit and most new WIFI routers.
- b. Through a laptop PC with WIFI.
- c. Through a mobile telephone (ios or Android).

This Quick Setup guide explains each of those setup options.

Configuration of IP Camera

When this product (IP Camera) is used for the first time, it needs to be connected wirelessly to a router with internet access via one of the three methods below.

a. WPS setup

- Press the WPS button in the panel of IPCAM for at least 5 seconds. The blue indicator will flicker rapidly after entering into the WPS mode. Then press the WPS button in the router which connects to IPCAM (the operation of router entering into WPS mode should refer to the manual of router).
- $\hfill\square$ The camera is now setup to the router.

Using mobile phone APP

Enable phone network function, install and run "LSCAM" software.

Click "Click here to add camera".

Different options are listed.

Scan QR code (This is the easiest method to setup)

- Run"Scan QR code".
- □ Scan QR code (supplied with each unit)

 After entering "user" and "Password", click"save". As default username is admin, password is null.
